**DETAILED ACTION*****Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-21 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-21 of copending Application No. 10/625,735. Although the conflicting claims are not identical, they are not patentably distinct from each other because the difference between claims 1-21 of the present application and claims 1-21 of copending Application No. 10/625,735 is that claims 1-21 are method claims of playing back data from a medium and claims 1-21 of copending Application No. 10/625,735 are apparatus claims for playing back the data from a medium. However, it is noted that it is obvious to one of ordinary skill in the art to use the apparatus claims 1-21 of copending Application No.

10/625,735 to perform the method claims 1-21 of the present application and to produce claims 1-21 of the present application since the method claims 1-21 of the present application correspond apparatus claims 1-21 of copending Application No. 10/625,735.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claim 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamagami (6,334,025) in view of Official Notice .

Regarding claim 21, Yamagami discloses an apparatus for performing a method of playing back encoded audio data recorded in a first region on a storage medium, the method comprising:

reading from the storage medium encoded catalog information ( images and/or text information) stored in a second region of the storage medium and related to the encoded audio data and buffering the read encoded catalog information in a buffer (12)(column 11, lines 5-20, Fig. 8) ; and

reading and decoding the encoded audio data and catalog playback information from the first region of the storage medium while reading and decoding the buffered encoded catalog information from the buffer according to the read and decoded catalog playback information (Fig. 8, column 12, lines 1- 45).

Yamagami fails to teach the image and or text information is catalog information as claimed . However, it is noted that capturing and producing images or text information as catalog information is well known in the art . Therefore Official Notice is taken and it would have been obvious to one of ordinary skill in the art to modify Yamagami by providing the image and text as catalog information as an alternative to the images and text information of Yamagami .
